

J&K Communications, Inc. is a forty-one-year-old company specializing in the sales and service of two-way and telemetry wireless radio equipment. We know that our team members are our number one asset; and as the industry continues to grow, so do we.

J & K is in the immediate need of a tower climber/RF technician in the Northeastern Indiana area. 2-3 years of experience in tower climbing and basic electronic/RF knowledge is preferred. J&K will entertain training the applicant in the tower climbing portion if the applicant has at least the basic electronics knowledge and is willing to climb.

**Job Requirements:**

- individual should be an ambitious self-starter, punctual, and customer service oriented
- have excellent documentation and strong team building skills
- ensure projects are completed on time and within budget
- install and service antenna systems and radio equipment following verbal or written instruction/drawings
- ability to sweep cables and use testing tools/software
- understanding and knowledge to test for proper service and signal strength
- must have extensive knowledge of equipment, climbing, rigging and safety procedures
- prior climbing certifications preferred
- must be very safety oriented and possess a valid driver's license
- must be able to lift heavy objects
- must be willing to travel
- Monday-Friday schedule with occasional weekend work

J & K offers competitive wages, training, positive team environment, and excellent benefits including: paid holidays, paid earned time off, medical & dental insurance coverage, uniforms, and 401(k) benefits
