Minimum Age Required: 18

How Should The Job Seeker Contact You:

Submit resumes on-line: www.ultra-electronics.com/careers.php

Benefits: Health Insurance & Vacation

USSI Production Engineers function as centers of expertise in manufacturing systems and best practices, including line setups, part and material flow, personnel and machinery optimization, ergonomics, and failure mode analysis. Production Engineers will work with the Production Team Leaders to support sonobuoy manufacturing by writing work instructions, implementing industry best practices (lean concepts, 5S, Value Stream Mapping, constraint analysis, etc.), conducting Job Safety and ergonomic analysis, and leading failure mode analysis activities. Additionally, Production Engineers are integral in developing line layouts and capacity analysis, and are heavily involved with the development and implementation of improvements related to production flow, tooling, facilities, material and common design areas across products, and product performance. The Production Engineer is also the primary point of contact for the Design Engineering group in the implementation of design for manufacturing programs
